

Palmer Imaging Consultation Services

A RADIOLOGY SERVICE FOR CHIROPRACTORS FROM THE PALMER CHIROPRACTIC CLINICS

Diagnostic imaging interpretations (including digital and plain film X-ray, MRI and CT)
by Matthew Richardson, D.C., DACBR, Director of Clinical Radiology—Florida Campus

In today's practice environment, many chiropractors are choosing to have their radiographs interpreted by a chiropractic radiologist, or Diplomate of the American Chiropractic Board of Radiology (DACBR). Having your X-ray, MRI or CT images interpreted by a DACBR will improve your diagnostic confidence and patient management—as well as reduce your liability—by providing professional radiology reports and answers to imaging questions.

The Palmer Chiropractic Clinics offer these services to chiropractors throughout the United States and worldwide, through Palmer Imaging Consultation Services (PICS) and Dr. Matthew Richardson.

WITH PICS, YOU WILL BE ABLE TO:

- Refer patients to the Port Orange Clinic for digital X-rays, including a radiology report by Dr. Matthew Richardson.
- Receive detailed radiology reports (via e-mail, fax or postal mail), including images with highlighted osseous and soft tissue pathology, as well as information on biomechanical changes.
- Take advantage of flexible billing options—we can bill you, your patient's insurance or your patient.
- Use the PICS postage-paid business reply labels we provide for your film packages, making shipping easy and no extra cost to you!
- Receive a History/Billing data sheet, for a brief but pertinent clinical history along with insurance and billing information.
- Dr. Richardson may be contacted via his office at (386) 763-2615.

Fees for PICS services start at \$20 for interpretation of regional X-ray exams.

For more information about fees, or if you have any questions about our services, please call (386) 763-2776 or visit palmer.edu/pics
