### CRITICAL APPRAISAL

<b>Are the results of the study valid?</b>	
Did participating patients present a diagnostic uncertainty?	
Did investigators compare the test to an appropriate, independent reference standard?	

Were those interpreting the test and reference standard blind to the other results?	
Did investigators perform the same reference standard to all patients regardless of the results of the test under investigation?	
<b>What are the results?</b>	
What likelihood ratios are associated with the range of possible test results?	

Strength of Evidence:

How does this apply to your patient?
